

USHNA HIDAYAT

CYBER SECURITY AND DIGITAL FORENSICS STUDENT

Bahawalpur, Punjab, Pakistan | 03285437010 | ushnahidayat@gmail.com

PROFESSIONAL PROFILE

Seeking SOC/Cybersecurity internship opportunities to develop hands-on expertise in threat detection, real-time log analysis, and incident response. Passionate about defensive security and protecting enterprise systems from cyber attacks. Completed TryHackMe cybersecurity training covering networking, SIEM, endpoint security, SOC fundamentals, and detection engineering.

WORK EXPERIENCE

Security Operations & Incident Response Specialist

- Designed and implemented secure multi-location enterprise network with VLAN segmentation, static routing, and Cisco ASA firewall configuration for SOC threat detection
- Conducted forensic investigation of Windows systems using Autopsy, recovering deleted files and identifying system artifacts with proper chain-of-custody documentation
- Analyzed network protocols (TCP/IP, DNS, HTTP/HTTPS) to identify anomalies and suspicious activity patterns
- Developed secure authentication systems with AES encryption for credential storage and security best practices validation

ForensiTrace v2.0 - Digital Forensic Investigation System

Developed comprehensive digital forensics system with 18 integrated forensic modules for evidence collection, analysis, and investigation. Modules include: Dashboard, Timeline Analyzer, File / Image Metadata, Hash Verifier, Browser History, Email Analyzer, Event Log Parser, Steganography, USB Monitor, Memory Dump, Deleted Files, Password Checker, Packet Analyzer, File Integrity Monitor, Malware Hash Lookup, Keyword Search, Charts, and Generate Report.

EDUCATION AND TRAINING

BS Cyber Security and Digital Forensics (5th Semester)

Islamia University of Bahawalpur, Pakistan | CGPA: 3.89, SGPA: 4.00

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) – Network Architecture & Security

VLAN configuration • Static routing • Firewall ruleset design • Network access control • Packet analysis

Google Cybersecurity Professional Certificate

Digital Forensics • Incident Investigation • Security Fundamentals • TCP/IP Protocols • Cryptography

TECHNICAL SKILLS

Network Security: VLAN configuration • Firewall design • Network access control • Packet analysis • TCP/IP analysis

Forensics & Incident Response: Windows forensics • Autopsy • Artifact recovery • Chain-of-custody • Log analysis

Tools & Platforms: Cisco Packet Tracer • Cisco ASA Firewall • Autopsy • TryHackMe • Networking tools

Security Fundamentals: AES Encryption • Authentication systems • TCP/IP protocols • Network security • Cryptography
